

E6PR • E4PR

ECO SIX AND FOUR PACK RING

The E6PR™ (Eco Six Pack Ring) is the first can ring made from compostable materials and by-product waste, making it a genuinely eco-first solution. Say goodbye to plastic rings, which are truly damaging to our environment!

When disposed of properly at a composting facility, the E6PR™ will degrade in days. When discarded and left out in open land or a water system, it will degrade in a matter of weeks¹. The compostable organic materials that make up the E6PR™ products are wildlife-friendly, causing no harm if accidentally consumed and digested.

The E6PR™ 6 and 4 pack rings are just the beginning of what should become a movement to rid the packaging industry of plastic!

E6PR

Manual Applicator

Simple, efficient and inexpensive with speeds up to 60 cans per minute

Mid-Speed Electric Applicator

Speeds up to 180 cans per minute

High Speed Applicator

Speeds up to 1200 cans per minute

Product Characteristics

- Material: Straw from natural fibers
- Color: Unbleached (Brown/Kraft)
- Odor: None
- Temperature resistance: up to 93 °C

Made from compostable organic materials that do not cause harm to wildlife in case of ingestion.

E4PR

Available in 4-Pack Rings

[1] Speed of degradation will vary depending environmental conditions
