# Green Glossary

**Biobased Content:** Defined by the USDA as products composed in whole or in significant part, of biological products or renewable domestic agricultural materials.

**Biodegradable:** Biodegradable items are those that have the ability to break down by biological means into new materials of nature that disappear into the environment.

**Compostable:** Compostable materials are a specific form of biodegradable material. To be classified as compostable, they must break down within a certain time period and under intensified conditions promoted by the composting process (i.e. increased heat).

**DfE:** "Design for the Environment" is the EPA's program that partners with leading companies to make safer products for consumers and the environment. DfE recognition means that product uses the safest possible ingredients that also insure the product performs well.

**EcoLogo™:** EcoLogo is North America's most widely recognized certification of environmental leadership. By setting standards and certifying products in more than 120 categories, EcoLogo helps you identify, trust, buy, and sell environmentally preferable ("green") goods and services.

**EFC Bleaching:** "Elemental Chlorine-Free" is bleaching without chlorine gas or hypochlorite, but with chlorine dioxide used in one or more stages.

**Green Seal® (GS-):** A widely recognized green product certification. The Green Seal organization is an independent, non-profit organization that strives to achieve a healthier and cleaner environment by identifying and promoting products and services that cause a less toxic pollution and waste, conserve resources and habitats, and minimize global warming and ozone depletion.

**GS-34** = Degreasing Agents in Production and Maintenance Operations

**GS-37** = Carpet Cleaners Used for Industrial & Institutional Purposes

**GS-40** = Industrial & Institutional Floor Finishes and Floor Finish Strippers

**GS-41** = Hand Cleaners & Hand Soaps used for Industrial & Institutional Hand Purposes

**PCW:** Post Consumer Waste - waste collected after the consumer has used and disposed of it.

**Recyclable:** Recyclable items are those that are collected after their useful life and made into new products, which then have recycled content.

**Solvent:** A liquid that is used for diluting or thinning a solution. A liquid that absorbs another liquid, gas, or solid in order to form a homogeneous mixture.

**Surfactant:** Any substance that when dissolved in an aqueous solution reduces its surface tension between it and another liquid.

**Made From Natur-Tec® Biopolymers**

1 in 5 PEOPLE  
DON'T WASH  
THEIR HANDS

OF THOSE THAT  
DO, ONLY  
30%  
USE SOAP!

On Friday, September 2, 2016, FDA issued the long expected final rule for over-the-counter (OTC) consumer antiseptic products. As a result, FDA will exclude 19 active ingredients, including Tricolsan that were previously listed on the monograph for over-the-counter wash products. These products are intended for use with water, and are rinsed off after use. This rule does not affect consumer hand “sanitizers” or wipes, or antibacterial products used in health care settings.

***Do I need anti-bacterial soap?***

For all those outside of healthcare and professional food handlers, proper hand washing with soap and water for 20 seconds will remove 90% of bacteria from hands. This means antibacterial soaps are not needed in most industries or at home. Just use non-antibacterial soap and water with proper hand washing procedures. Sanitizer may be added as an additional measure for instance during flu season or where soap and water is not available.

FDA recognizes the benefit to public health from antiseptic hand washes intended for use in healthcare settings or by professional food handlers and the new ruling does not affect products used in either of these settings.

THE AVERAGE PERSON  
WASHES THEIR HANDS FOR  
10-20  
SECONDS

THIS WILL REMOVE AROUND  
90% OF  
BACTERIA  
FROM THEIR HANDS

## FEMININE HYGIENE VENDING

### A. MASKIT

### MASKIT

An innovative new way to address the challenges of feminine hygiene disposal. MaskIT is easy to use, discreet and blocks odors. MaskIT's unique features reduce the risk of contamination from blood borne pathogens (e.g. HIV, Hep B, Hep C) by protecting the user's hand and then enclosing and sealing these items within the pouch. By offering your customers a hygienic solution for removal and disposal of feminine hygiene items you will reduce the risk of plumbing issues caused by flushing. The plant based biofilm is certified compostable. MaskIT comes in both a dispenser option for public restrooms or single use travel packs. Each dispenser accommodates both small and large pouches.

## DUST MOPS &amp; ACCESSORIES

**A. SWIFFER SWEEPERS****PROCTOR & GAMBLE**

The Swiffer Sweeper is designed to give you a deep clean on virtually any surface in your home. It can conveniently be used with either wet or dry cloths, while the lightweight swivel head allows you to get into tight corners and hard to reach spaces. The wet cloths give you a more thorough clean, dissolving dirt and grime better than an ordinary mop. The dry cloths are textured to pick up 50% more dirt, dust, and hair than a broom. Plus, the Swiffer Sweeper mop handle breaks down into four parts so you can easily adjust the length for cleaning or storage.

## STANDARD WET MOP WRINGERS, BUCKETS & COMBOS

### A. METAL BUCKETS & WRINGER

GEERPRES

#### Wringer

Simple, one-stroke operation makes these wringers up to three times more efficient than other designs. Features include a solid-steel gear shaft for durability; double-staggered metal gears for solid, slip-proof operation; and long-wearing steel bushings where the gear shaft enters side plates. Welded and riveted construction plus zinc electroplating makes these wringers as long lasting as they are effective. For 16-24 oz. mops.

G1010

1/EA

#### Galvanized Bucket

More usable capacity than oval buckets, more durability than plastic buckets! Because they're hot dip zinc galvanized after the bucket is formed, bending and drilling won't weaken these round buckets. Bail ears are welded below rim to prevent interference with wringer. A heavy wire reinforcement is formed into the top rim for added strength. Each perimeter reinforcing rib indicates a one gallon increment. High-density reinforced nylon spider attaches without rivet or bolt holes. Two inch double-raceway ball-bearing casters.

## A. CLING-ON PLASTIC FLAT MOP FRAMES

GEERPRES

The revolutionary, new Cling-On™ 16" plastic flat mop frame with quick connector has molded in spikes (no hook & loop strips) and holds your mop firmly in place allowing hands free mop removal after use. Addresses ongoing nuisance issue of having to replace VELCRO strips. With the patterned cut out frame, the cleaning solution won't "puddle" on the frame and allows flow-through to the mop. The quick connector allows the Cling-On™ to swivel 360° for efficient figure eight motion and flips up for easy cleaning of baseboards. Made of 100% Post-Consumer Recycled Material. Use with 16" and 18" mops.

## LOW DENSITY CAN LINERS

### A. LOW DENSITY CAN LINERS

- Excellent resistance to puncture and tears
- Recommended for sharper objects
- Use in areas such as manufacturing for heavier waste
- Liners for the 'back of the house'

**A. FRESHWAVE IAQ PRODUCTS****OMI INDUSTRIES**

Fresh Wave IAQ offers a comprehensive line of odor eliminating products in multiple formats to meet the most challenging odor abatement situations. Fresh Wave IAQ is the only line of odor eliminators that are non-toxic, non-hazardous, effective on both organic and inorganic odors and available in multiple formats.

**Gel**

The Fresh Wave IAQ Gel is completely non-toxic and has a continuous release formulation that works round-the-clock to provide constant odor elimination day or night. Ideal for combating persistent odor problems, simply place Fresh Wave IAQ into a shallow pan and let the natural airflow do the rest.

<b>OM5472</b>	2 gal Refill	Safer Choice	2/CS
<b>OM5846</b>	Dispenser	Wall Mount	6/CS

**Air & Surface Spray**

Fresh Wave IAQ's Air & Surface Spray is ideal for rapid, targeted odor control. It instantly bonds to, and eliminates, odor molecules in the air and those that have penetrated or are resting on fabrics or surfaces. Simple to use., just spray the affected areas and the odor will be eliminated.

<b>OM5836</b>	Bulk		6/70/CS

**M130 Mobile Vapor Phase Unit**

Developed to provide a "dry" dispersion method for the efficient and economical application of Fresh Wave IAQ Air & Surface Liquid odor eliminator. The Unit disburse sub-micron size particles for a greater degree of penetration into drapes, ceiling tiles, bedding and carpet, as well as cracks and crevices. The Unit dispenses 5,000 cubic feet of vapor per hour, quickly overwhelming larger spaces, penetrating every pore, crack and crevice. A safe alternative to using potentially harmful ozone generators or chemical laden "masking agents".

## FIRST AID

## A. PROWORKS FIRST AID KITS

HOSPECO

OSHA requires every establishment to have a first aid kit conveniently store on the premises in case of accidents or emergencies. ProWorks First Aid Kits are ANSI/ISEA Z308.1-2015 compliant for the Class and Type they are designed for. Refill kits are available separately making them an economical solution compared to monthly services. Kits will continue to maintain compliance when maintained with products that meet the applicable standards.

New ANSI/ISEA standards affecting First Aid Kits are now effective. The updates to this standard are the most comprehensive change to first aid kits in decades. The update reflects an assortment of supplies and quantities that are best suited to treat workplace injuries instead of designating kits by number of persons.

**Types of Kits**

**Class A:** Designed for common workplace injuries such as major and minor wounds, minor burns and eye injuries.

**Class B:** Designed for high risk work zones such as construction, utilities, industrial and manufacturing.

**Type I:** Intended for use in stationary, indoor applications where kit contents have minimal potential for damage due to environmental factors and rough handling.

**Type II:** Intended for use in portable indoor applications where the potential damage due to environmental factors and rough handling is minimal.

**Type III:** Intended for portable use in mobile indoor and/or outdoor settings where the potential for damage due environmental factors is not probable.

**Type IV:** Intended for portable use in mobile industries and/or outdoor applications where the potential for damage due to environmental factors and rough handling is significant.

**ProWorks Class A Minimum Fill First Aid Kit**

- Meets Z308.1-2015 minimum fill requirements for Class A Type I, II, III or IV
- Designed for common workplace injuries such as major and minor wounds, minor burns and eye injuries

## FILTERS

### A. LIFEASSURE™ BLA SERIES PREFILTER

Designed with pleated nylon 66 membrane in an all-polypropylene cartridge construction, LifeASSURE filters are ideally suited for a wide range of pre-filtration and clarification applications.

CUBLA065B03BA	30"	.65 Micron	1/EA
---------------	-----	------------	------

### B. BETAPURE™ NT SERIES FILTER

Can be used for rough clarification to reduce turbidity or to filter water before it is added to wine or used for cleaning. Cartridges consist of three layers that allow uniform flow and distribution of contaminants.

NT30T050S2BA	30"	5 Micron	1/EA
NT30T010S2BA	30"	1 Micron	1/EA

### C. LIFEASSURE™ BA SERIES FINAL MEMBRANE FILTER

These filters employ a nylon 66 membrane in an all-polypropylene cartridge. This sterile filter delivers excellent spoilage microorganism retention while greatly minimizing any organoleptic interference. This highly durable membrane/cartridge design withstands repeated exposure to hot water sanitation and steam sterilization.

## CARTON SEALING TAPE COMPARISON CHART

**Hot Melt Adhesives** are noted for quiet release and easy unwind during application. They also have excellent adhesion to corrugated properties at varied temperatures.

**Acrylic Adhesives** are noted for clear, non-yellowing properties. They are best suited for application on corrugated properties and low temperature applications.

	HOT MELT	ACRYLIC
Quick Tack	Excellent	Excellent
Corrugated Adhesion	Very Good	Good
Moisture Resistance	Good	Good
Clarity	Good	Excellent
Application Temperature	45° to 120° F	32° to 140° F

### HELPFUL TAPE HINTS:

- Seal boxes with just one strip of tape.
- If you are using 2 strips of 2" tape, try a 3" tape or thicker mil. This will save time and money.
- Always seal boxes a minimum of 2 inches down the sides.

3"

- For boxes over 16" wide
- Difficult to adhere surfaces
- For boxes where flap/lids do not meet
- Underfilled/overfilled RSC boxes

2"

- For boxes 15" or less
- For boxes where flap/lids do not meet

- Varnish coating is recommended for floodcoats in black and blue. Add 5% to the standard price. Varnish coating is treated as an additional ink color (i.e., 3 max).
- Sleeves (recommended for artwork that needs to appear seamless); please inquire for specific tooling charges.
- Borders: When not bleeding off the edge, 1/16" top/bottom edge for anything below 180 cases and 3/16" for 180+ cases.
- Fluorescent and metallic inks are not recommended due to poor water resistance and fade resistance.

## Direct Thermal / Thermal Transfer Labels and Thermal Transfer Ribbons

**Question #1** Are you printing your own labels?

**Question #2** What is the core size? 3" or 1"?

**Question #3** Do you use a ribbon to print your labels?

**Question #4** What is the make & model of the printer?

**Question #5** What are your adhesive requirements?

### Direct Thermal Labels (Does NOT use a ribbon)

\*Direct Thermal Labels use heat sensitive facstock (similar to thermal fax paper) this type of coated facstock darkens when heat is applied to it.

\*Direct Thermal Labels are primarily used for short duration applications, such as barcode labels, shipping labels, compliance labels, and parking tickets.

\*Direct Thermal Images may fade over time. If the label is overexposed to heat, direct sunlight, abrasion or chemical abrasion, the material will darken and make the text or bar code unreadable. For these reasons, direct thermal printing is not used for lifetime identification applications.

### Cash Register Rolls/ POS (Point of Sale) Rolls

**Question #1** Is it bond or thermal paper?

**Question #2** What is the make and model # of your Register?

Common Printers: Fujitsu, NCR, Tec, Verifone, NCR, Micros, Diebold

**Question #3** What is the width and length of roll?

Most common sizes 3 1/8" thermal, 2 1/4" thermal, 3" Bond

Applications include: Cash Register, Kiosks, ATM, Gas Pumps,

### Cash Register Ribbons / POS (Point of Sale) Ribbons

**If customer is using a bond POS roll they are using a ribbon to image.**

\*We need to know printer make & model # in order to determine ribbon

#### 2 Types of Label Printers

Commercial/Industrial label printers can typically hold a larger roll of stock (up to 8" wide) and are geared for medium-volume printing. Uses a 3" Core

Desktop label printers are generally designed for light- to medium-duty usage with a roll of stock up to 4" wide. Uses a 1" core.

### Thermal Transfer Labels (USES a ribbon)

\*Thermal Transfer Labels use heat to transfer ink from ribbon onto the label for a permanent print. In thermal transfer printing, a thermal printhead applies heat to a wax based ink ribbon, which melts ink onto the material to form the image. The ink is absorbed so that the image becomes part of the media.

\*Thermal Transfer Labels are more permanent and meant for use for labels that will be read for many months or years. Thermal transfer labels use a label material that does not react to heat. The image is more permanent and the label will not fade or mark up over time.

\*Thermal Transfer Label applications include: product identification, permanent identification, sample and file tracking, asset tagging, inventory identification, certification labels, laboratory specimens, cold storage and freezers, and outdoor applications.

### Thermal Transfer Ribbons

Printer Make & Model #

\*We need to know this in order to determine the thermal transfer ribbon

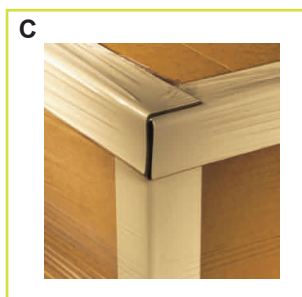

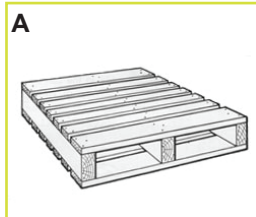

Common Label Printers: Datamax, Zebra, Sato, Intermec.

There are three grades of ribbon for use with a thermal transfer printers:

**Wax** is the most popular with some smudge resistance, and is suitable for matte and semi-gloss paper labels.

**Wax / Resin** is smudge resistant, suitable for semi-gloss paper and some synthetic labels.

**Resin** is scratch and chemical resistant, suitable for coated synthetic labels

Container Dri II is a new generation of packaging protection for the reduction of dew point and the control of condensation. Its design allows water vapor to easily enter through the flexible packaging film and into the interior or the bag where it is concentrated into a thick gel. Container Dri II has the ability to protect shipments from start to finish. Container Dri II is completely safe, non-toxic, and may be disposed of with regular waste.

### Business Credit Terms

Please be advised that all information will be held in strictest confidence. Upon Credit Approval, a credit limit may be established at the sole discretion of WCP Solutions (Creditor). Applicant authorizes Creditor to conduct a credit investigation and contact any/all references as provided.

Applicant's signature attests financial responsibility, ability, and willingness to pay Creditor invoices in accordance with the terms stated on each invoice. No terms or conditions on a Purchase Order differing from the terms of Creditor shall be accepted unless agreed on by Creditor in writing. A finance charge equal to the maximum amount allowed by law but not to exceed 1.5% per month may be imposed on delinquent invoices. Payments may be applied against open charges at the discretion of Creditor. In the event that the account becomes delinquent, the applicant waives the right to a jury trial and the prevailing party is entitled to attorney fees for any action, suit, claim, arbitration or appeal. Venue and jurisdiction of any legal action may lie either in the county (or borough) and state of the Creditor's branch office or King County, WA at the sole option of Creditor.

Applicant agrees to notify Creditor of any changes in ownership or legal status of the business. Until Creditor receives written notice by certified mail of any change in ownership or entity, applicant agrees to accept liability for all charges to the business conducted under the firm name.

Should credit availability be granted by Creditor, all decisions with respect to the extension, continuation, or termination of credit shall be at sole discretion of Creditor. If application for business credit is denied; there is a denial of a request for an increase in applicant's credit limit; or credit has been terminated, applicant has the right within 60 days to request a written statement of the specific reasons for the denial. Creditor will send written statement of reasons for the denial within 30 days of receiving request.

Applicant certifies that the above information is true and correct to the best of their knowledge, agrees to be bound by all the terms and conditions contained in this application, and further agrees that a facsimile shall be as binding as an original signature.

### Personal Guaranty

In Consideration of WCP Solutions (hereinafter referred to as "WCP") granting credit to \_\_\_\_\_ (hereinafter referred to as "Company"), the undersigned personally and unconditionally guarantees to WCP and any of its affiliates the payment of any obligation of the Company and its successors and assigns including any new entity formed. This obligation includes any and all of the Company's liabilities, obligations, debts and indebtedness to WCP, now owing or hereinafter incurred or created including all costs, fees and expenses, including but not limited to all legal, collection and other professional expenses. Venue and jurisdiction of any legal action will be either in the county (or borough) and state of the Creditor's branch office or King County, Washington, at the sole option of WCP.

The undersigned:

- Understands this is a continuing and irrevocable guaranty and is binding on the Guarantor and Guarantor's heirs, successors and assigns so long as any indebtedness remains unpaid.
- Understands the guaranty shall continue until the undersigned has notified WCP in writing of its cancellation, but such cancellation shall not alter any obligation of the undersigned arising hereunder prior to receipt of such written notice.
- Consents to hereby waive notice of default, nonpayment and notice thereof.
- Agrees that a facsimile shall be as binding as an original signature.
- Acknowledges and represents that any title(s) written near the signature below is/are intended merely to clarify the individual's position with the company and in no way is/are intended to limit or cancel the personal nature of this guaranty.

The undersigned personal guarantor, recognizing that his/her individual credit history may be a necessary factor in the evaluation of this personal guaranty, hereby consents to and authorizes the use of consumer credit reports on the undersigned by the above named business credit grantor from time to time as may be needed in the credit evaluation process.
