E-SYSTEM 2000

The E-System 2000 is an automatic horizontal cartoner for erecting, loading and closing end load cartons. It's method of operation is:

- 1) End load carton is removed from a supply magazine via vacuum system
- 2) Carton is erected at a single product load station
- 3) Product is manually or automatically (optional) horizontally loaded into carton
- 4) Loaded carton is transported to the closing position for tuck closure or sealing with either hot melt glue or hot air
- 5) A completed carton is then automatically delivered from the machine to a convenient working height

D. LIFEASSURE™ BA SERIES FINAL MEMBRANE FILTER

These filters employ a nylon 66 membrane in an all-polypropylene cartridge. This sterile filter delivers excellent spoilage microorganism retention while greatly minimizing any organoleptic interference. This highly durable membrane/cartridge design withstands repeated exposure to hot water sanitation and steam sterilization.
