

INFINITYCORE™ THERMAL LINER

# CURBSIDE RECYCLABLE COLD CHAIN SHIPPER

**Why not use 100% CURBSIDE RECYCLABLE cold temperature thermal packaging?**

InfinityCore thermal liners are industry first packaging materials manufactured by Cellulose Material Solutions, LLC (CMS). Unlike other packaging products, InfinityCore is the only box liner comprised entirely of polyethylene terephthalate (PET). Recycled PET fibers are used for the core and a PET film is applied inline to the sides of the panels, eliminating the need to over bag or seal the individual panels. Plus, InfinityCore can be reused or recycled with plastics.

- Curbside recyclable
- Liners made from 100% recycled materials
- Made from recycled plastic bottles (PET fiber)
- Up to 72 hour thermal performance
- Reduce freight costs
- Keep product from spoiling
- Replaces eps (styrofoam) coolers
- Ships flat and reduces floor space for inventory
- Improved customer experience
